

Here are some quick videos to help get your shop setup!

Adding a simple product:

- ☐ This is a product that does *not* have multiple variations such as colors, sizes etc.
- ☐ Don't forget to add the price or else the customer won't be able to checkout!
- ☐ Don't forget to add the categories on the right as shown in the video so customers can find your products.

Adding a variable product:

- ☐ This is a product that does have multiple options for the customer to pick from such as color, size, etc.
- ☐ Don't forget to select "variable product" at the top of the listing.
- ☐ Here it's very important that you add the price under the "variation" tab towards the bottom after adding the attributes.
- ☐ Under the variation tab you can also set different prices and quantities for each variation. Example. 10 red shirts in stock, 8 blue shirts in stock.
- ☐ This can get confusing and we are more than happy to help, please email support@spouse-ly.com

Adding Shipping to your shop:

- ☐ You must have shipping setup in order for a customer to checkout, please make sure to test your listing by adding to cart to see if the shipping is set up correctly.
- ☐ Right now all shipping will take place off of Spouse-ly, you will create the shipping label with your preferred carrier and then come back to Spouse-ly to add tracking and mark as "completed". This will trigger your payment.

Getting paid, after you have gotten an order:

- ☐ Please make sure that under settings-payments you have your Stripe account connected.
- ☐ You must add tracking and mark the order “complete” in order to get paid.
- ☐ All orders will show unpaid until you have completed the order and manually updated to show that. As we continue to grow this will be improved and automated.
- ☐ If you run into any issues where you do not see a payment come through please let us know.
